

## Why the new AAHA Pet Health Insurance Program leads the pack:

**Other pet insurance companies claim to offer comprehensive pet insurance coverage for dogs and cats, but that means different things to different providers. With the new AAHA Pet Health Insurance program, every policy includes\*\*:**

### **We cover the complete sick visit — including the exam. Most other insurance providers don't**

When pets get sick or injured, they need a trip to the veterinarian, and an exam to diagnose the problem. While some providers don't cover the cost of the exam, Petplan does, saving pet parents between \$50-\$250 per visit on average.

### **With Petplan, your pet is Covered For Life®**

While your reimbursement options may change, Petplan will never terminate your policy based on your claims history or just because your pet is sick. Other pet insurance providers can leave your pet without coverage when they need it the most.

### **We offer comprehensive dental coverage for oral disease and injuries**

Petplan's comprehensive dental coverage protects against multiple accidents and injuries including broken teeth, periodontal disease, extractions and advanced dental treatments such as root canal therapy, – with no dental condition limits.

### **Chronic and hereditary coverage you can count on**

We cover chronic and hereditary conditions that your best friend may develop in the future as long as there is no interruption or cancellation of your policy. Other pet insurance providers may require a rider for this coverage — if they provide it at all.

### **We cover pets of any age**

Petplan extends coverage to dogs and cats of all ages six weeks and older – unlike some providers who deny coverage for pets past a certain age.

### **No Claims Credit:**

For each consecutive 12-month policy period that a pet has been insured by Petplan and has gone without a paid claim, a 2% credit shall be awarded to the customer at renewal, up to a maximum credit of 10%.
